

FOOD PROCESSING SOFTWARE

Fish Processing

Operating in over 20 Fish & Seafood processing plants, Emydex is the market leading supplier of factory floor software system to Fish & Seafood Processors in Ireland and the UK.

Our customers include 3 of the top 4 Landing Ports in Ireland, along with other White Fish, Salmon and Shellfish processing customers, who are some of the largest Value-Added and Further Processing Seafood plants in Ireland & the UK.

The Emydex Fish & Seafood software system provides Traceability and Production reporting from factory door-to-door covering Landings, Production, Order Picking, Dispatch and Supplier Payments. Our Weigh-labelling Software system for Boats is currently running on a large fleet of trawlers in Ireland for both fresh prawns and 'frozen at sea'.

"Emydex has become a crucial and integral part of our organisation. They have reshaped the way we implement solutions throughout our production facilities. There are many matrixes involved with the processing of fish/shellfish, Emydex have simplified these to make our lives much easier, with the help of their fantastic support team."

Alan Corcoran, Financial Controller, Rockabill Shellfish Ltd

Fish processing system features include:

- ▶ Labelling at Sea (Boat System)
- ▶ Landings & 3rd Party Intake
- ▶ Raw Material Stock Control
- ▶ De-Heading
- ▶ Filleting

FACTORY FLOOR SOFTWARE FOR FOOD PROCESSORS

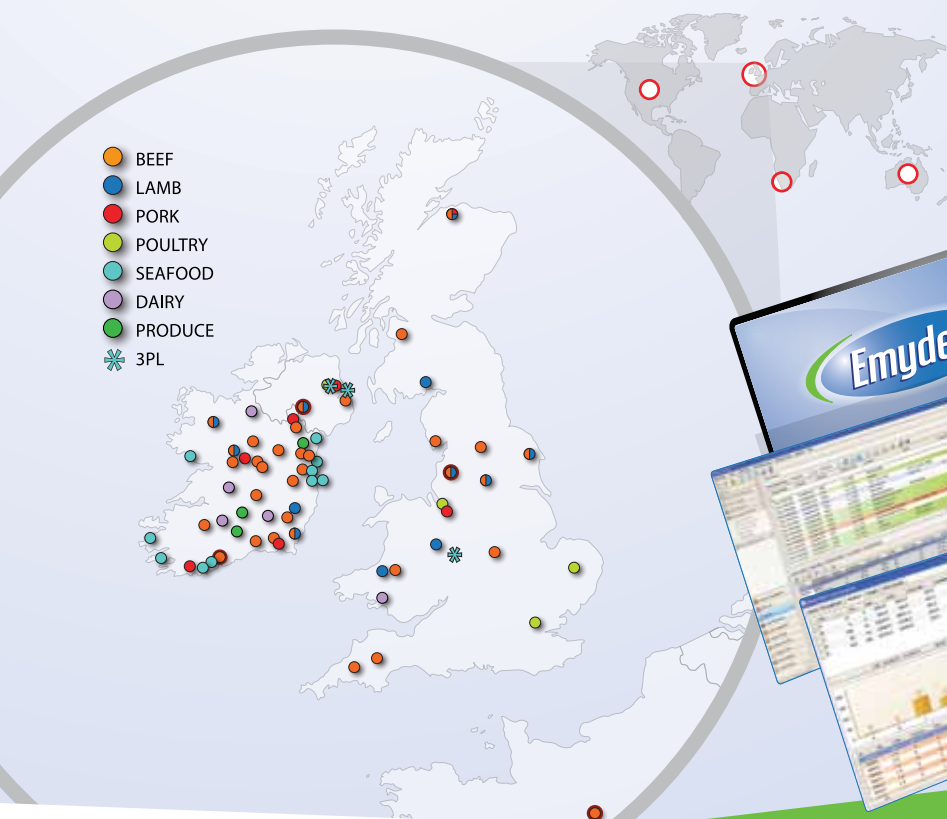

Customisable Food Processing Software Solutions

Emydex specialise in the design, development and implementation of factory floor software systems for the Food Industry.

Using our software, food processors can monitor, control and report on all stages of their production processes, gaining full traceability of food produced from door to door.

Emydex software is modular in design so food processors large and small have the option to roll-out our modules on a piecemeal basis meaning less risk, time and cost.

Global Customer Network

How we differ from other software providers:

Hardware Flexibility

Emydex software will run on any compatible hardware device offering customers the flexibility to reuse existing hardware or shop around for the best options.

Software Flexibility

Our open technology platform allows ease of integration to any 3rd party or in-house software systems such as financials, ERP or 3rd party cold stores.

Flexibility to Customise

Emydex software can be customised to suit any existing work practices so customers never have to change their existing business processes to suit the system.
