

# Poultry Processing

Emydex offer a complete solution for all sectors of the Poultry processing industry, whether you are a primary or secondary processing plant or manufacturing plant of Poultry based products. Emydex offers stock analysis, stock traceability, mass balance, process yields, and 3rd party cold store integration, with box level traceability.

Emydex is the market leading supplier of factory floor software systems to Poultry processors around the world and is designed to cater for both single plant and multi plant operations. Our Poultry customers include the largest Poultry processor in Europe and two of the largest Poultry processors in the UK, whom combined process over 50,000 tonnes of Chicken per annum. Our clients also include market leading Cooked Meats, Value-Added and Further Processing Poultry plants.

*"Emydex have developed and implemented seamless, efficient and innovative solutions into a fairly complex production environment. Their experience in food production and traceability adds another level to systems design, bringing additional ideas and concepts. Support is excellent."*

Paul Johnson - Financial Director - Moy Park Ballymena

## Poultry processing system features include:

- ▶ Livestock Weighbridge Intake / Kill Line Grading
- ▶ Raw Material Intake, Trays & Labels
- ▶ Work in Progress & Batch Weighing
- ▶ A-Frames & Dollies
- ▶ OCM Packing – Weigh / Labelling
- ▶ Retail Packing
- ▶ Warehousing & Stock Management

- ▶ Recipe System
- ▶ Yields, Giveaway & Efficiency Reporting
- ▶ Order Management System
- ▶ Sales Order Picking & Dispatch
- ▶ Container Loading & Shipments
- ▶ Management Dashboard & KPI Reporting
- ▶ Quality & Compliance Management
- ▶ Forwards & Backwards Traceability Reporting
- ▶ Dry Goods & Packaging Control
- ▶ Production Planning & Forecasting
- ▶ 3rd Party ERP System Integration
- ▶ 3rd Party Cold Store Integration

# FACTORY FLOOR SOFTWARE FOR FOOD PROCESSORS

## Customisable Food Processing Software Solutions

Emydex specialise in the design, development and implementation of factory floor software systems for the Food Industry.

Using our software, food processors can monitor, control and report on all stages of their production processes, gaining full traceability of food produced from door to door.

Emydex software is modular in design so food processors large and small have the option to roll-out our modules on a piecemeal basis meaning less risk, time and cost.

### How we differ from other software providers:

#### Hardware Flexibility

Emydex software will run on any compatible hardware device offering customers the flexibility to reuse existing hardware or shop around for the best options.

#### Software Flexibility

Our open technology platform allows ease of integration to any 3rd party or in-house software systems such as financials, ERP or 3rd party cold stores.

#### Flexibility to Customise

Emydex software can be customised to suit any existing work practices so customers never have to change their existing business processes to suit the system.
